### Ears

On a donkey, these are tougher and smaller than they are on a horse.

### Tail

Longer and coarser than on a horse, but the texture can vary. Does not have as much natural grease as a horse's does and so is not good at protecting from rain.

### Hooves

Short and rarely longer than several inches. Feels coarse.

### Coat

Like that of a cow because it is covered in short body hair except for a fluffy tuft on the end!

### Mane

Long and well-supplied with blood vessels. They help to cool the body.

Can you label the 8 missing points on the donkey?
